Centro Cultural Baudilio Vega Berríos, Calle McKinley Plaza

INSTRUCTORS:

Peter Piet, BSc MALD CMLI

Associate Director Steer Davies Gleave

Yilia Baucage-Bou, PE

Steer Davies Gleave Puerto Rico Office Leader

Martha Bravo Colunga, PPL

Bicycle and Pedestrian Coordinator, Highway and Transportation Authority

WORKSHOP OBJECTIVES

- Introduce the Complete Streets Plan and Design Guidelines being adopted by Puerto Rico.
- Learn the “movement and place” approach to streetscape design that is being adopted globally and which is proposed in the design guidelines.
- Provide insight into how by adopting the innovative approach to street design existing policies and design standards should be updated to recognize Puerto Rico’s Complete Streets vision.
- Provide design criteria that will apply to new construction projects, reconstruction or rehabilitation of our roads and other public spaces to improve mobility, accessibility and safety.
- Apply the design criteria of complete streets in demonstration projects according to the context of the street.

AUDIENCE

The workshop is aimed at professionals in planning, engineering and architecture and other related disciplines involved in the planning, design and construction of projects to improve mobility, accessibility and safety on our public roads. **Spaces limited to 40 people each day.**

ORGANIZERS: Strategic Planning Office of the Highway and Transportation Authority in coordination with Puerto Rico Planning Society, Instituto de Ingenieros Civiles, Instituto de Ingenieros de Transportación ITE-PR y Colegio de Arquitectos y Arquitectos Paisajistas.

COMPLETE STREETS PLAN AND DESIGN GUIDELINES FOR PUERTO RICO WORKSHOP

PRELIMINARY PROGRAM

Morning session

A general introduction to the Complete Streets Plan and Design Guidelines and to some of the key approaches proposed within the document.

- 8:00 am Registration
- 8:45 am Welcome
- 9:00 am General introduction
 - Objectives of the Complete Streets Plan Design Guidelines
 - Public policy context
 - Relationship with the other plans (Bike Ped Plan, SHSP, LRTP 2045)
 - Document content – brief overview
- 9:30 am Complete Streets and consideration of place
 - Introduction to complete streets
 - Existing streets of Puerto Rico
 - An introduction to movement and place
- 10:30 am Break
- 10:45 am Defining street types and modal priority
 - Street types for Puerto Rico
 - Relationship of street types to existing road classifications
 - Layered movement networks and modal priority
- 12:00 m Lunch

Afternoon Session

Working with examples contained within the Complete Streets Plan and Design Guidelines participants will undertake a number of group tasks using the approaches defined in the Guidelines and report back to the entire workshop on their findings (Two (2) or more groups will be defined based on number of participants).

- 1:30 pm Task setting
 - Aims and objectives of session
 - Introduction to Example 1 Ponce de Leon Avenue
 - Introduction to Example 2 Victoria and Reina Streets
- 1:45 pm Task work
 - Identification existing and proposed street type or types
 - Preparation of typical street sections based on different modal priorities
- 3:00 pm Break
- 3:15 pm Report back by facilitators
Conclusions and recommendations
Wrap up and thank-you
- 4:00 pm Closing

CONTINUING EDUCATION

Five (5) contact hours will be to the planning, architecture and engineering profession.
SPP – CIAPR – CAAPPR: 5HSW CREC
